

Unit 6

Nursing Innovation for Nursing Students Innovation Based on Ethics, Professional Code, and Cultural Context

Asst. Prof. Dr. wariya Chankham

LEARNING OBJECTIVES

After this lesson, students will be able to:

- Explain the meaning of Nursing Innovation
- Describe the role of ethics, professional code, and culture in nursing innovation
- Apply ethical thinking when creating nursing innovation ideas.

WHAT IS NURSING INNOVATION?

Nursing Innovation refers to:

- **New or improved ideas, methods, tools, or processes in nursing care**
- **Aimed at improving patient safety, quality of care, and quality of life**
- **Can be simple, practical, and applicable in real nursing practice**

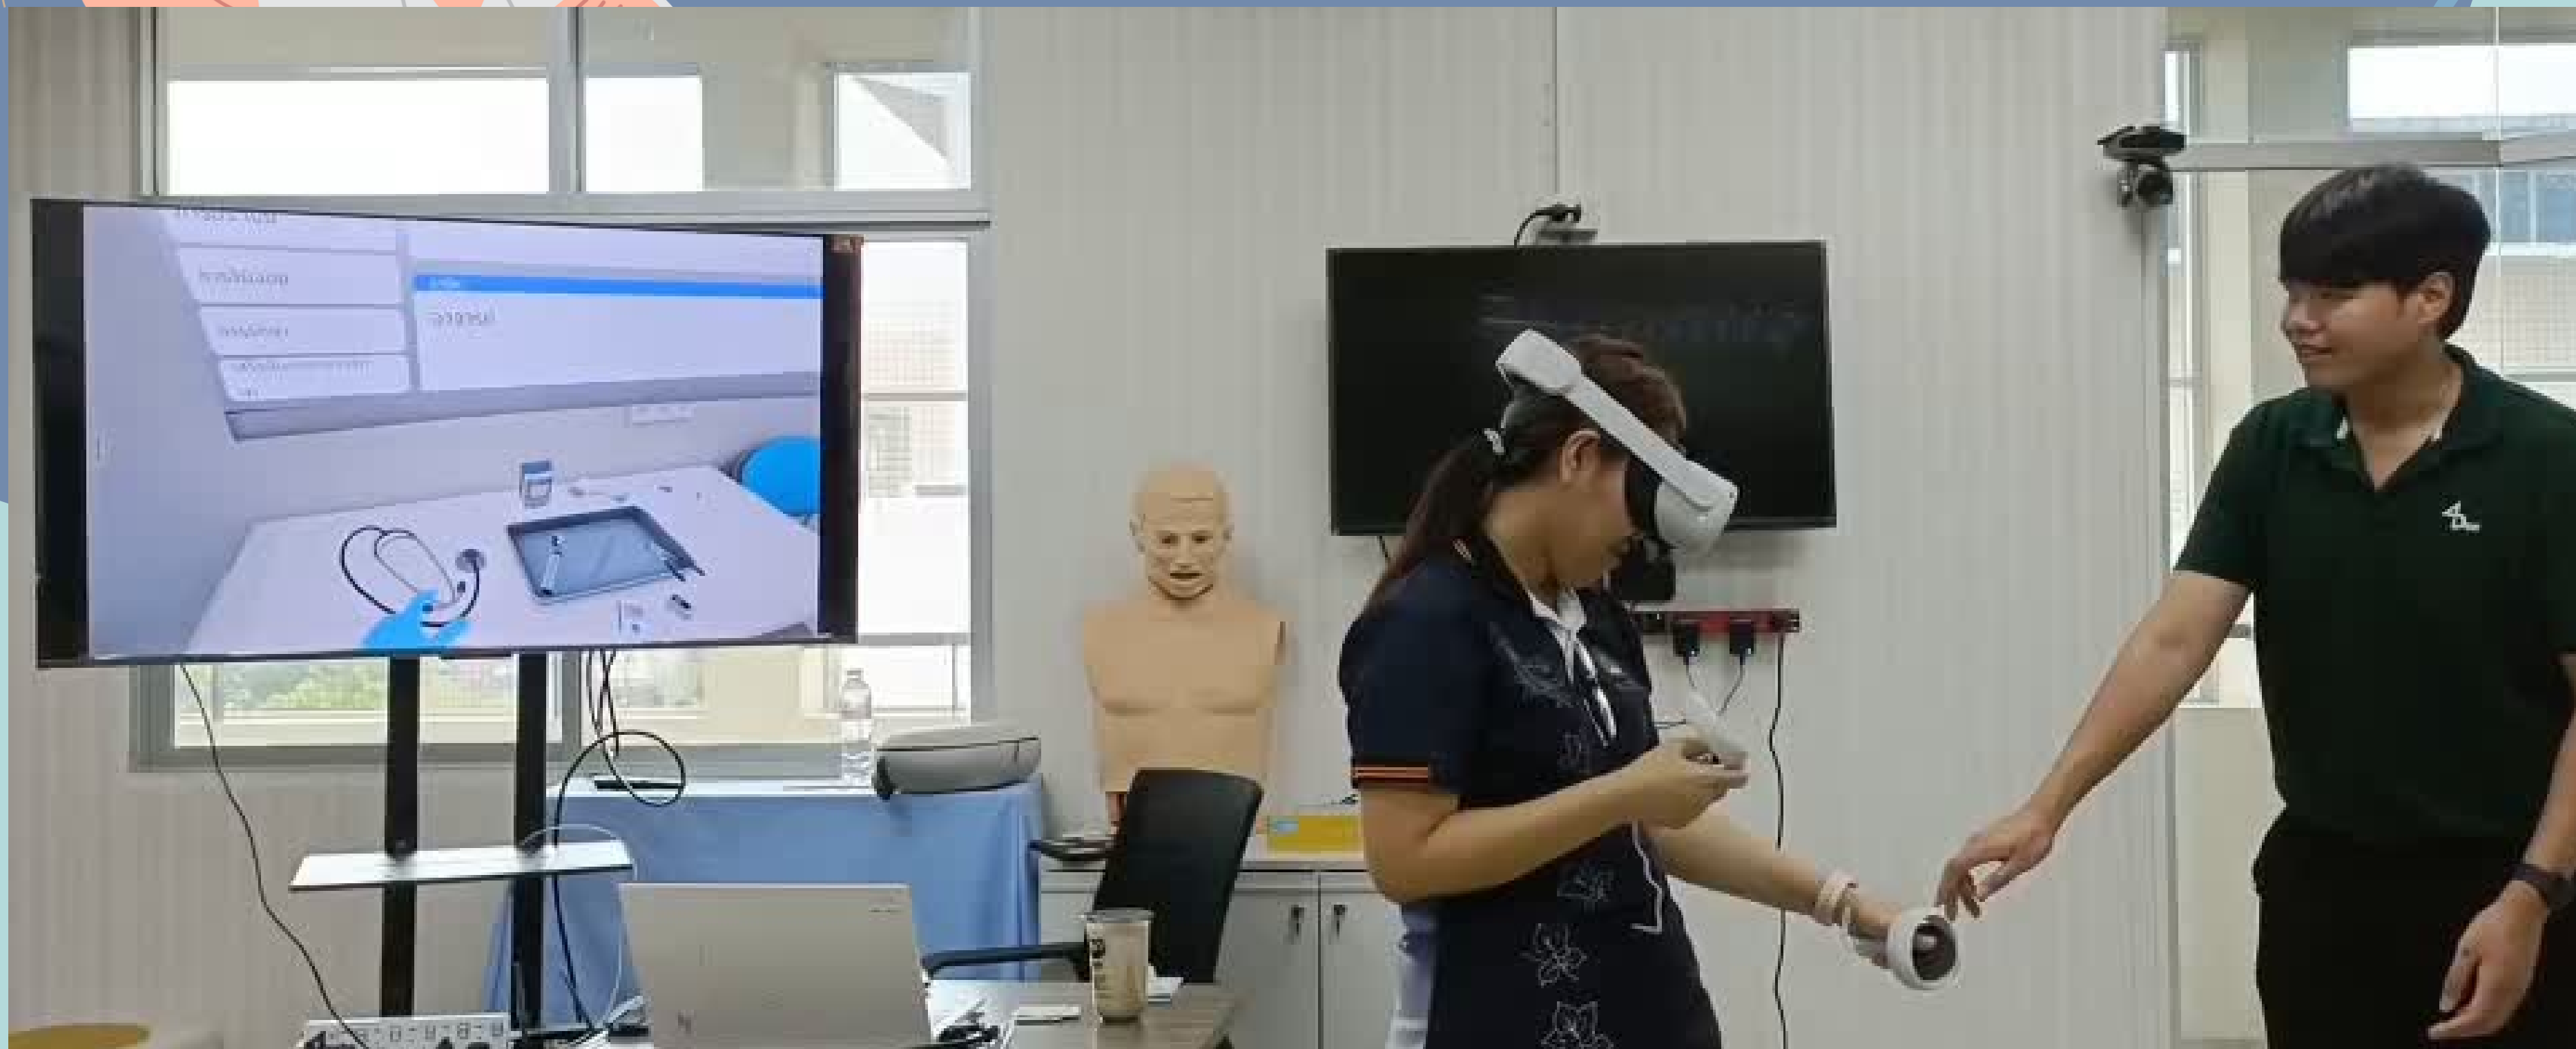

WHY NURSING INNOVATION MATTERS

- **Healthcare problems are complex and constantly changing**
- **Patients have diverse needs and cultural backgrounds**
- **Nurses are closest to patients and understand real problems**
- **Innovation helps nurses provide better, safer, and more human-centered care**

EXAMPLE FOR PRACTICE WHEN WE WANT TO LEARNING FOR PHYSICAL EXAMINATION VIA VR

CORE FOUNDATION OF NURSING INNOVATION

Nursing Innovation must be based on:

- 1. Ethics in Nursing**
- 2. Professional Code of Nursing**
- 3. Cultural and Social Context**

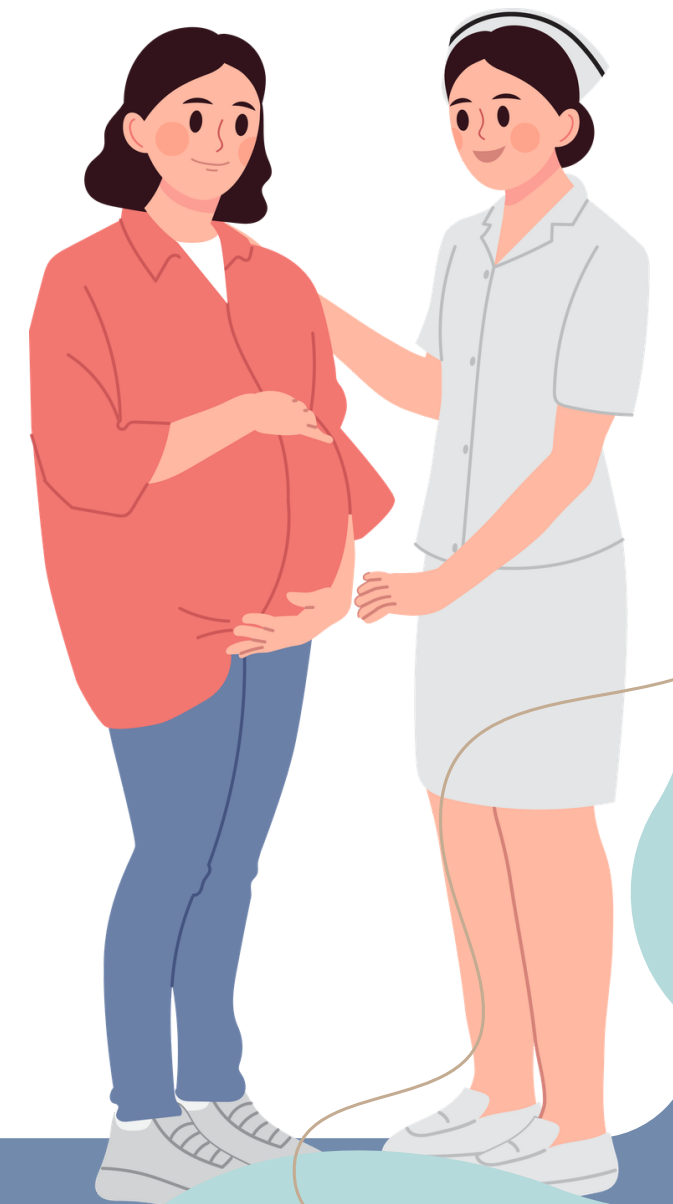

ETHICS IN NURSING INNOVATION

Ethics guide nurses to do what is right and safe.

Key ethical principles:

- **Autonomy – Respect patient decisions**
- **Beneficence – Do good for patients**
- **Non-maleficence – Do no harm**
- **Justice – Fair and equal care**

ETHICAL QUESTIONS FOR INNOVATION

Before creating an innovation, ask:

- Does this respect patient rights and dignity?
- Is the patient informed and willing?
- Could this cause physical or psychological harm?
- Is it fair and accessible to all patients?

PROFESSIONAL CODE OF NURSING

Nursing innovation must follow professional values:

- **Responsibility and accountability**
- **Honesty and integrity**
- **Confidentiality and privacy**
- **Compassion and respect for human dignity**

CULTURE AND CONTEXT IN NURSING CARE

Patients are not just diseases. They have:

- **Beliefs and values**
- **Family and community roles**
- **Cultural and religious practices**

Innovation must fit the patient's real life and social context.

EXAMPLE 1 – ETHICAL HEALTH EDUCATION MEDIA

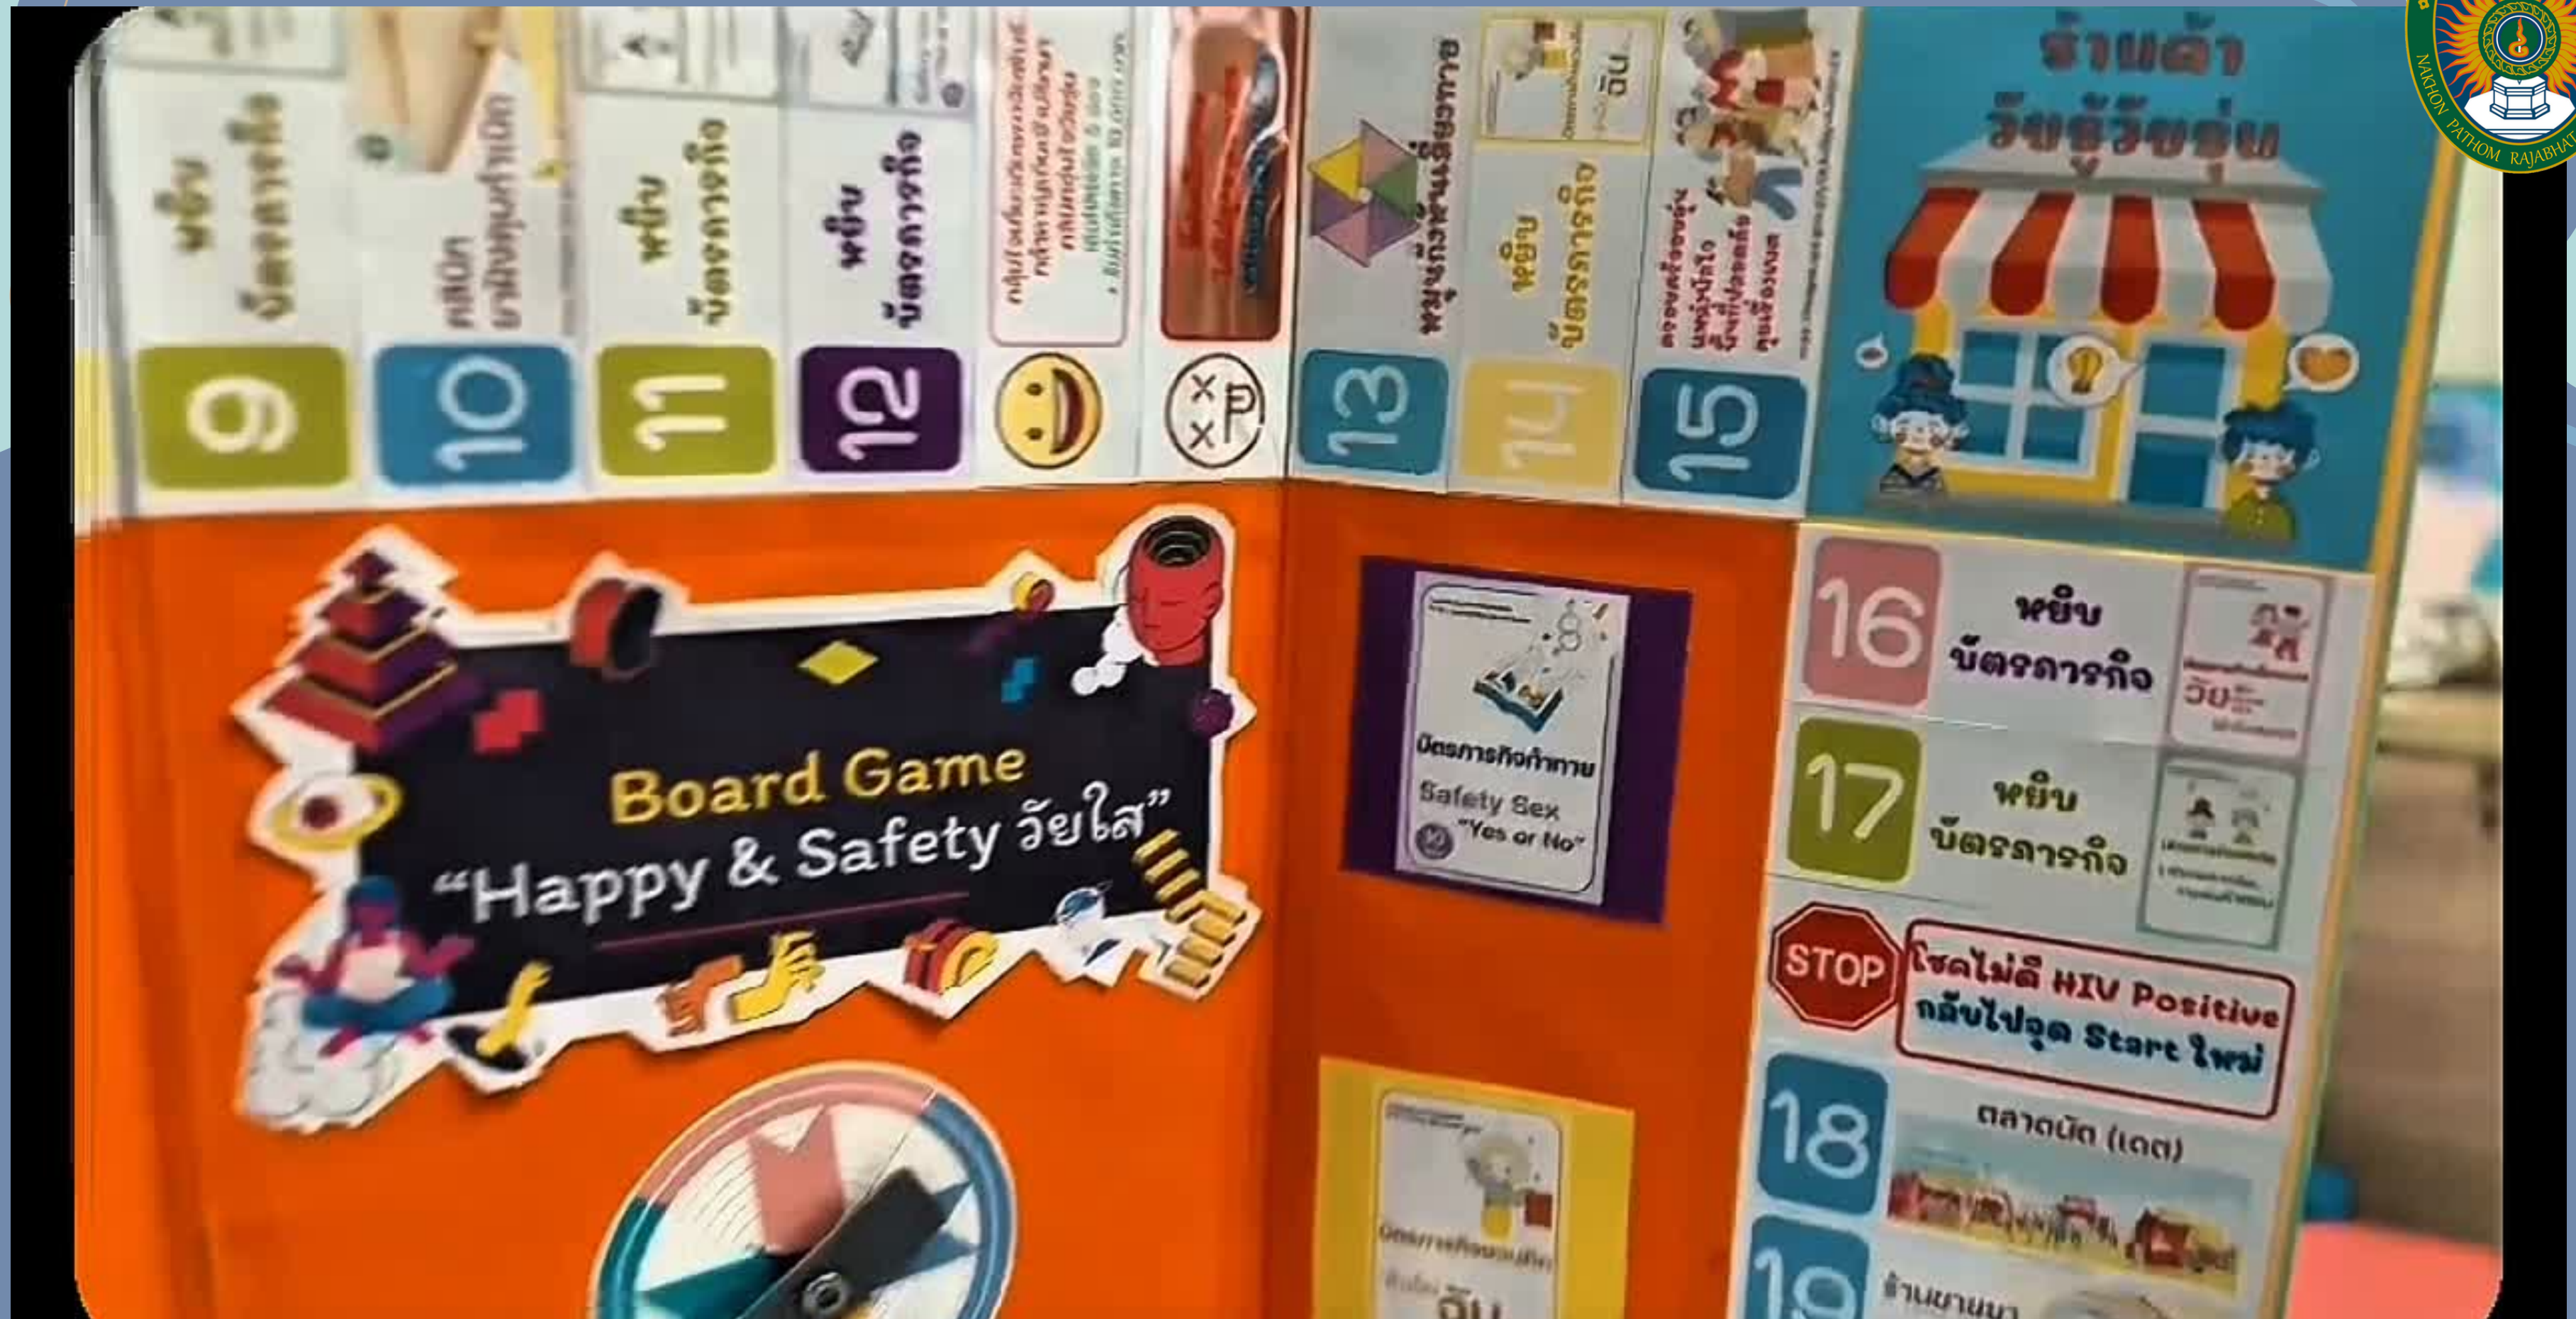

- 1. Easy-to-understand language**
- 2. No stigma or blame**
- 3. Evidence-based information**
- 4. Respect patient privacy**

EXAMPLES OF NURSING INNOVATION

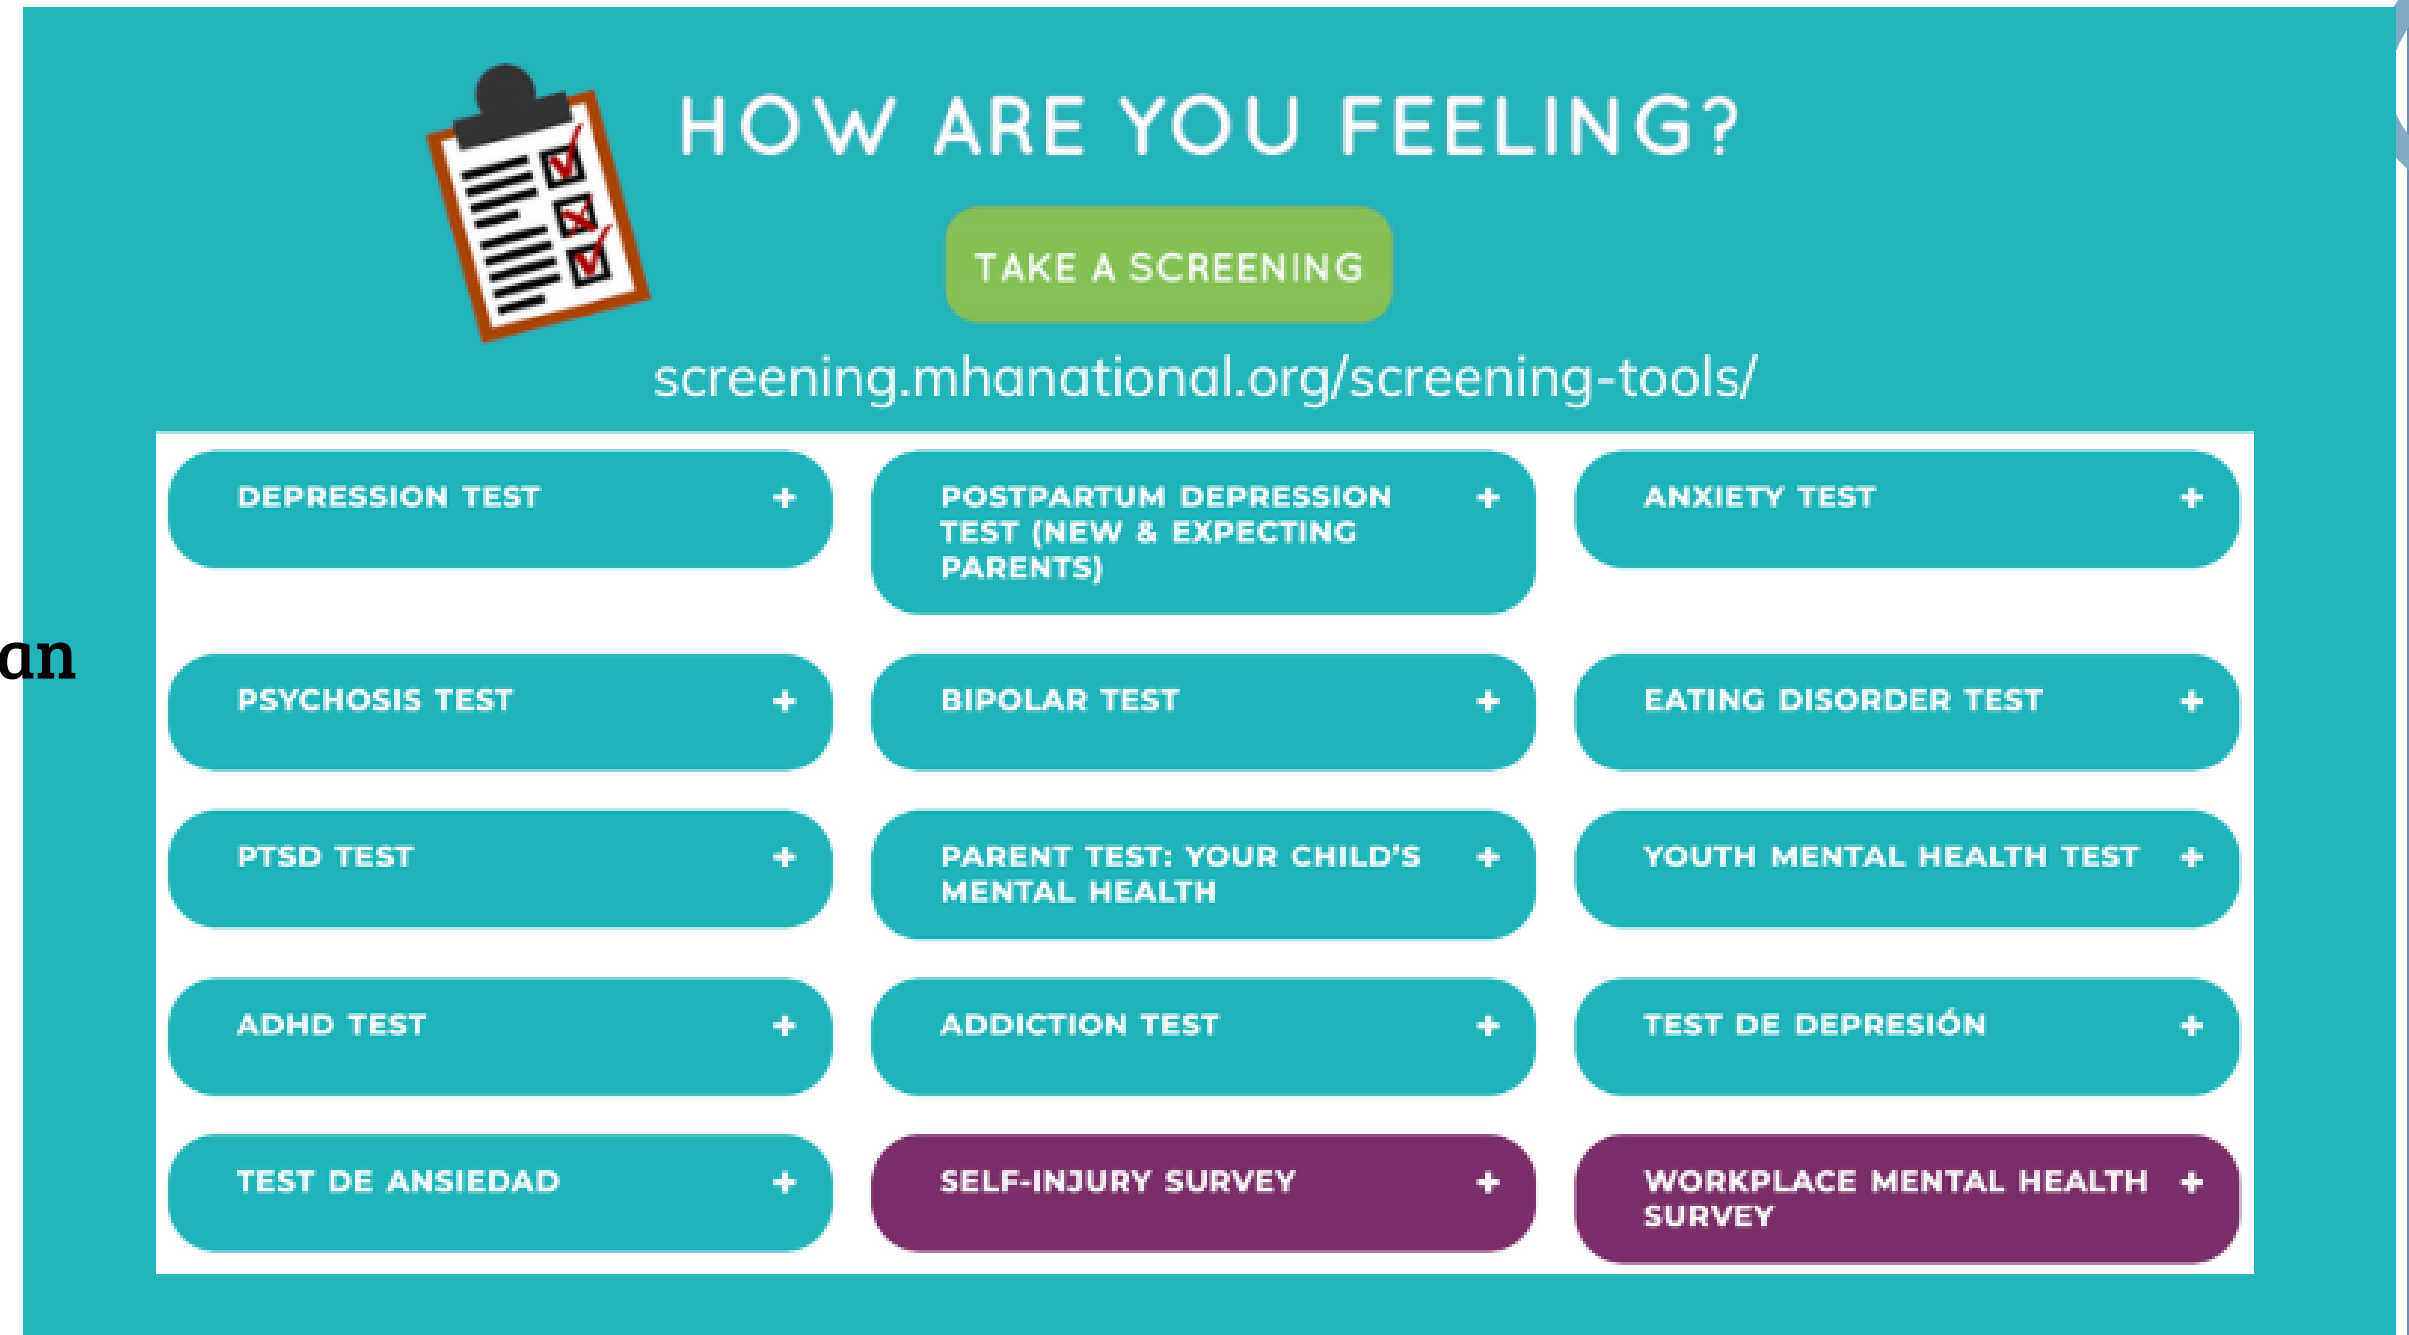

- 1. A model demonstrating the mechanism of childbirth.**
- 2. Health education videos or infographics**
- 3. Simple assessment tools or checklists**
- 4. Mobile or online follow-up systems (with consent)**
- 5. Community-based health promotion activities**
- 6. Board Game for health education.**
- 7. Jigsaw puzzles promote child development.**

EXAMPLES OF NURSING INNOVATION

EXAMPLE 2 – MENTAL HEALTH SCREENING TOOL

1. Voluntary participation
2. Confidential data handling
3. Clear referral and support plan
4. Cultural sensitivity

 HOW ARE YOU FEELING?

TAKE A SCREENING
